

FORM CATALOGUE

SUPPORTING YOUR BRA DEVELOPMENT PROJECT.

A LARGE SELECTION OF MOLD FORMS
TO SUPPORT YOUR CREATIVE VISION

FORM CATALOGUE

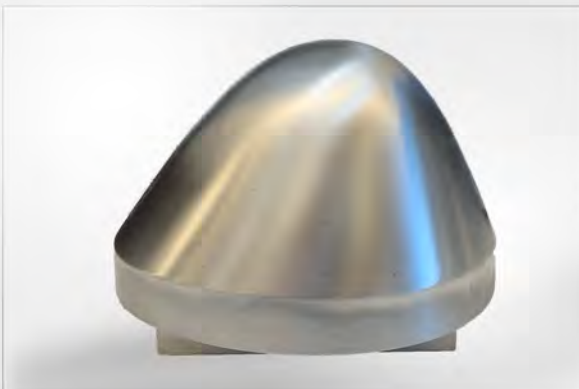

NOTHING CAN STAND IN THE WAY OF YOUR CREATIVITY.

When finding the base for their bra development, we offer our clients a large selection of mold shapes and sizes to choose from, with cup sizes starting from AA and going all the way up to a K cup. For each cup size, there are mirrored mold forms for the left and for the right breast.

WE ADAPT OUR MOLD FORMS TO YOUR PRODUCTS.

- ④ The center gore/bridge size is customisable.
- ④ Soft transitions to thermoforming to avoid shiny edges and leaving marks.
- ④ Form adaptation to the grainline from 0° - 90°, e.g. rotated 45°.

FORM SPACER

Customer specific mold forms are available on request

The production of foam and spacer bra cups requires expertise and specially developed moulds. After collaborating with our clients on the development of the moulds, we manufacture the cups to the highest standards.

FORMS 3D EMBOSSING

3D embossing on Spacer and foam cups

We emboss straps, bridges, back parts, inlays for shaping, as well as customer logos or texts.
